

SOLIDEAL[®]

OTT TRACKMASTER[™]

Solideal, designers and manufacturers of the most inventive over the tyre tracks.

OTT[®] Tracks have been designed to fit all major skid steer machines which use 10x16.5 and 12x16.5 tyres.

OTT[®] Tracks are the optimal solution to improve stability, manoeuvrability and machine efficiency. Easy to mount and demount in less than 15 minutes in the field. OTT[®] 's are ideal for muddy conditions, providing your machine with superior traction and reduced ground pressure, for all season's use including landscaping.

OTT[®] Tracks have a full closed floatation surface, a self - cleaning tread, a stone resistant carcass, a low weight, low vibrations and high comfort. OTT[®] Tracks turn your skid steer into the most versatile vehicle for all use.

OTT[®] Tracks are an original idea from Solideal which has been extensively tested over more than 3 years. The OTT[®] Tracks are manufactured using the highest quality natural rubber, with continuous winded steel cord, spring steel reinforcements and wear resistant hinges. Its unique and patented friction system prevents tyre slip and eliminates de-tracking; in combination with the applied low tension it is particularly drive train friendly.

OTT[®] Track downsizing kit has been developed as a complete kit which includes the OTT[®] Tracks, tyres and appropriate wheel combination. This kit will allow a suitable conversion of skid steer machines using 10x16.5 tyres to 27x10.5-15 tyres, and from 14x17.5 tyres to 12x16.5 tyres. This "all in one" kit makes the conversion of skid steer machine to OTT[®] 's fast and easy.

Every pair of OTT[®] Tracks includes a full-link, 3/4 link, 1/2 link, the appropriate tools and an instruction manual.
